

Experiential Learning Methodology

Academic Year: 2018-2019

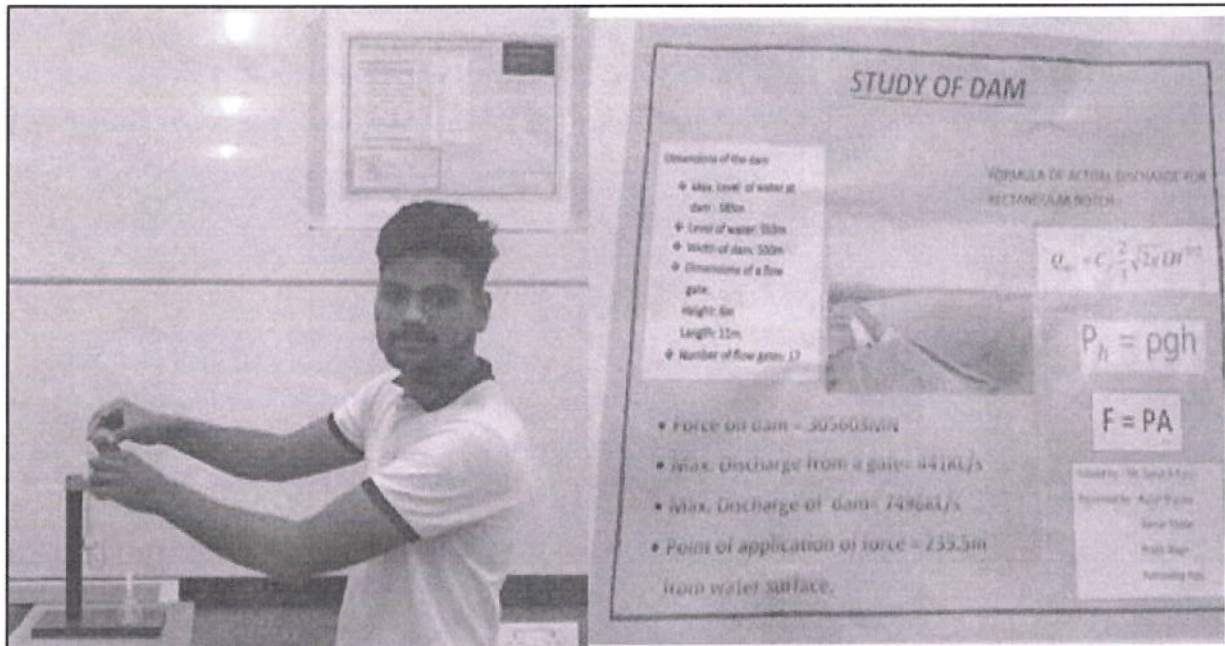

Project based Learning activity for students

Event Details: The Project-Based Learning approach creates a constructive experiential, participative learning environment in which students construct their own Projects. In order to improve learning environment, our institute organized a Project Based Learning activity for students. On Saturday 27 October 2018 a project exhibition was organized by SVKM Institute of Technology, Dhule with an aim to encourage and implement theoretical concepts of subjects in practical manner by doing projects. Students of Mechanical Engineering Department had presented and demonstrated the projects in presence of Principal and Departmental Faculties. The exhibition is appreciated by authorities.
