Attainment of Course Outcome

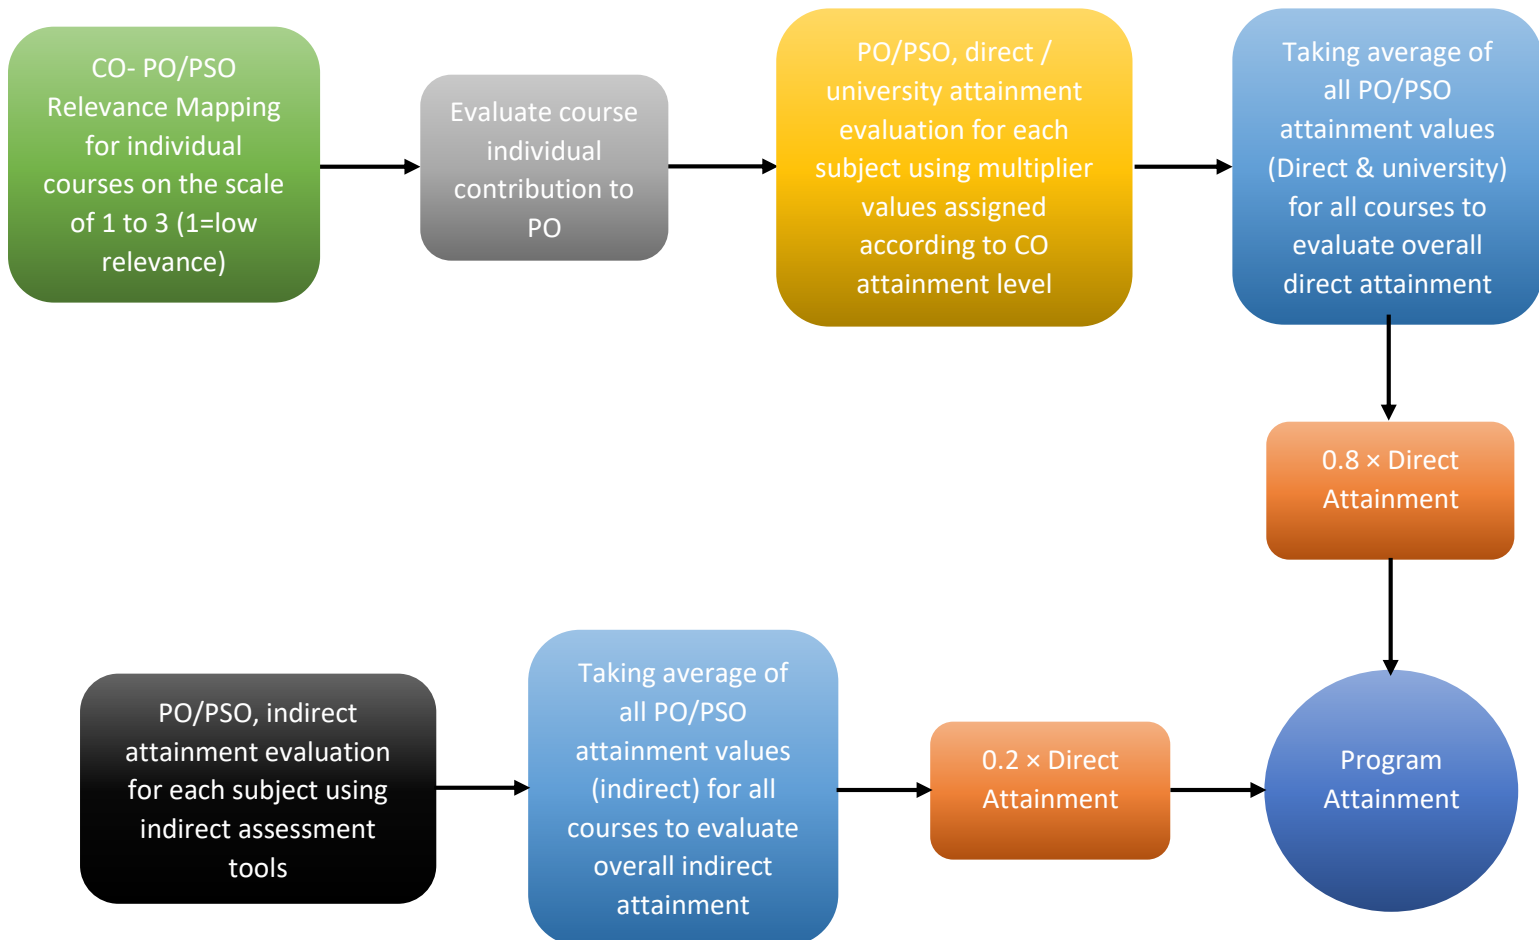

| % students scored more than the target value | Attainment level |
|----------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

Attainment of Program Outcome

If Attainment level is less than target

- Reason for low attainment
- Remedial action plan for that sem to cover up
- Action plan for next academic session in order to achieve target value

If Attainment level is equal to or greater than target

- Revision of target for next academic session

The process of attainment of POs and PSOs of individual course in the four-year engineering degree program requires measuring tools. Respective faculty member prepares course outcomes using the concept of engineering subject. Then, a correlation is established between COs with POs/PSOs on the scale of 0 to 3 where 0 means no correlation and 3 means high correlation. Mapping matrix of COs-POs and COs-PSOs is prepared for all courses in the program.

Assessment tools are categorized into direct and indirect methods to assess whether the program specific outcomes (PSO) and program outcomes (PO) are attained. Direct methods include direct examinations of student, conducted throughout the semester. It is carried out in the form of continuous internal assessment tests, end semester examinations, assignments, unit tests and laboratory assignments etc. Indirect method is based on course exit survey, program exit survey, alumni survey etc. A target value is set for CO, PO and PSO and attainment is calculated with respect to that target value.

For CO attainment, it is calculated how many students have scored more than the target value which is already set by the course coordinator in the internal exam and university exams. Attainment levels are defined as per the following table:

| % students scored more than the target value | Attainment level |
|----------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

For PO attainment, multiplier factors are defined based on CO attainment as per following table:

| Percentage students scored more than the target value | Multiplier factor |
|-------------------------------------------------------|-------------------|
| 0-50% | 0.33 |
| 50-60% | 0.66 |
| >60% | 1 |

This multiplier factor is multiplied with the value assigned in the CO-PO relevance table and final attainment of each PO is calculated as demonstrated in the following steps :

**Shri Vile Parle Kelavani Mandal's
Institute of Technology, Dhule
Department of Civil Engineering**

Step no 1: CO-PO Relevance

| Sub code and Subject | CO | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-------------------------------|---------|------|------|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| BTCVC503 soil Mechanics | C0503.1 | 1 | 2 | 1 | 1 | | 1 | | | | 1 | | |
| | C0503.2 | 3 | 2 | 1 | 2 | | | | | | | | 1 |
| | C0503.3 | 1 | 1 | | 3 | | | | | | | | |
| CO503 Average | | 1.66 | 1.66 | 1 | 2 | | 1 | | | | 1 | | 1 |

Step no2: Calculation of multiplying factor for each CO and finally PO attainment

| Sub code and Subject | CO | PSO1 | PSO2 | PSO3 |
|----------------------------|--------|------|------|------|
| BTCVC503 soil Mechanics | C503.1 | 1 | 1 | 1 |
| | C503.2 | 2 | 1 | 1 |
| | C503.3 | 1 | 1 | |
| Average | | 2 | 1 | 1 |

PO attainment (Direct) is calculated by for both the internal assessment test and university exams for each. In the case of indirect attainment, it is calculated only on the basis of the course exit survey which is taken by the course coordinator at the end of the course.

Finally, an articulation matrix is formed, in which all subjects (from Sem I to Sem VIII) are incorporated with their PO and PSO attainment values (Direct/ indirect). For calculating program indirect attainment. Average value of indirect attainment for all subjects is calculated and program indirect This final average value is considered as the program indirect attainment value. Direct attainment of the program is calculated by taking the average of PO values attained through university exams and internal assessment tests.

| Direct assessment Methods | | |
|---------------------------|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sr. No. | Assessment tool | Method description |
| 1. | Internal assessment test | The internal assessment(IA) marks in a theory paper is based on number of tests, conducted as scheduled in the departmental academic calendar. It is a metric to continuously assess the attainment of course outcomes with respect to course objectives. The total marks of all tests being asked for each CO is calculated for CO attainment purpose |

|----|--------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2. | Lab Assignments | Lab Assignment is one of the measuring criteria to mainly assess student's practical knowledge with their experimental capabilities. In case of practical, the IA marks shall be based on the laboratory records, practical tests and viva-voce |
| 3. | Theory Semester Examination & Practical Semester Examination | Semester examination (theory or practical) are the metric to assess whether all the course outcomes are attained or not, framed by the course owner. Semester Examination is more focused on attainment of course outcomes and uses a descriptive exam. |
| 4. | Seminar | The IA marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator assigned by the department |
| 5. | Mini Project | The IA marks in the case of mini-project shall be based on continuous evaluation by a faculty coordinator (project guide if allotted) assigned by the department |
| 6. | Project | The IA marks in projects in the final years shall be based on the continuous evaluation throughout the semester by an internal committee consisting of the three faculty members of the Department, one of whom shall be the project guide |

The process of attainment of POs and PSOs of individual course in the four-year engineering degree program requires measuring tools. Respective faculty member prepares course outcomes using the concept of engineering subject. Then, a correlation is established between COs with POs/PSOs on the scale of 0 to 3 where 0 means no correlation and 3 means high correlation. Mapping matrix of COs-POs and COs-PSOs is prepared for all courses in the program.

Assessment tools are categorized into direct and indirect methods to assess whether the program specific outcomes (PSO) and program outcomes (PO) are attained. Direct methods include direct examinations of student, conducted throughout the semester. It is carried out in the form of continuous internal assessment tests, end semester examinations, assignments, unit tests and laboratory assignments etc. Indirect method is based on course exit survey, program exit survey, alumni survey etc. A target value is set for CO, PO and PSO and attainment is calculated with respect to that target value.

For CO attainment, it is calculated how many students have scored more than the target value which is already set by the course coordinator in the internal exam and university exams. Attainment levels are defined as per the following table:

| % students scored more than the target value | Attainment level |
|----------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

For PO attainment, multiplier factors are defined based on CO attainment as per following table:

| Percentage students scored more than the target value | Multiplier factor |
|-------------------------------------------------------|-------------------|
| 0-50% | 0.33 |
| 50-60% | 0.66 |
| >60% | 1 |

This multiplier factor is multiplied with the value assigned in the CO-PO relevance table and final attainment of each PO is calculated as demonstrated in the following steps :

PO attainment (Direct) is calculated by for both the internal assessment test and university exams for each. In the case of indirect attainment, it is calculated only on the basis of the course exit survey which is taken by the course coordinator at the end of the course.

Finally, an articulation matrix is formed, in which all subjects (from Sem I to Sem VIII) are incorporated with their PO and PSO attainment values (Direct/ indirect). For calculating program indirect attainment Average value of indirect attainment for all subjects is calculated and program indirect This final average value is considered as the program indirect attainment value. Direct attainment of the program is calculated by taking the average of PO values attained through university exams and internal assessment tests.

| Sr. No. | Assessment tool | Method description |
| 1. | Internal assessment test | The internal assessment(IA) marks in a theory paper is based on number of tests, conducted as scheduled in the departmental academic calendar. It is a metric to continuously assess the attainment of course outcomes with respect to course objectives. The total marks of all tests being asked for each CO is calculated for CO attainment purpose |
| 2. | Lab Assignments | Lab Assignment is one of the measuring criteria to mainly assess student's practical knowledge with their experimental capabilities. In case of practical, the IA marks shall be based on the laboratory records, practical tests and viva-voce |
| 3. | Theory Semester Examination & Practical Semester Examination | Semester examination (theory or practical) are the metric to assess whether all the course outcomes are attained or not, framed by the course owner. Semester Examination is more focused on attainment of course outcomes and uses a descriptive exam. |
| 4. | Seminar | The IA marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator assigned by the department |
| 5. | Mini Project | The IA marks in the case of mini-project shall be based on continuous evaluation by a faculty coordinator (project guide if allotted) assigned by the department |
| 6. | Project | The IA marks in projects in the final years shall be based on the continuous evaluation throughout the semester by an internal committee consisting of the three faculty members of the Department, one of whom shall be the project guide |

| BTCOC401 | Design & Analysis of Algorithms | C401.1 | Examine the running time of an algorithm using asymptotic analysis and to check correctness of algorithm by solving recurrence relation. | 2 | 3 | 2 | 1 | | | | | | | | 1 | 2 | 1 | |
| | | C401.2 | Describe the Divide-and-Conquer paradigm and use this technique to solve different algorithms. | 2 | 3 | 2 | | | | | | | | | 1 | 2 | 1 | |
| | | C401.3 | Describe the Backtracking, Branch and Bound paradigm and use this technique to solve different algorithms. | 2 | 3 | 2 | | | | | | | | | 1 | 2 | 1 | |
| | | C401.4 | Describe the Greedy paradigm and use this technique to solve different algorithms. | 2 | 3 | 2 | | | | | | | | | 1 | 2 | 1 | |
| | | C401.5 | Describe the Dynamic Programming paradigm and use this technique to solve different algorithms and examine the classes of algorithms based on P, NP, and NP-Complete | 2 | 3 | 2 | 1 | | | | | | | | 1 | 2 | 1 | |
| BTCOC402 | Operating System | C402.1 | To Comprehend and Use basic concepts of Operating System with its structure | 2 | | | | | | | | | | | 1 | 2 | 1 | |
| | | C402.2 | To Illustrate concepts of Process as well as Thread Management along with Implement concepts of CPU Scheduling algorithms. | 2 | 2 | | | 1 | | | | | | | 2 | 2 | | |
| | | C402.3 | To Illustrate concepts of Process Synchronization as well as deadlock along with Implement concepts of Synchronization primitives and banker's algorithms | 2 | 2 | | | 1 | | | | | | | 2 | 2 | | |
| | | C402.4 | To Comprehend concepts of Memory Management along with Implement concepts of page replacement algorithms and memory allocation algorithms | 2 | 2 | | | 1 | | | | | | | 2 | 2 | | |
| | | C402.5 | To Illustrate concepts of File System Manipulation as well as Disk Management along with Implement concepts of file allocation algorithms and disk scheduling algorithms | 2 | 2 | | | 1 | | | | | | | 1 | 2 | 2 | |
| BTHM403 | Basic Human Rights | C403.1 | Discuss the importance, philosophical and historical perspectives of human rights | | | | | | | 2 | | 1 | 1 | 1 | | | | |
| | | C403.2 | Examine the challenges of the pluralistic society and the rising conflicts and tensions in the name of particular loyalties to caste, religion, region and culture | | | | | | | 3 | | 1 | 1 | 2 | | | | |
| | | C403.3 | Discuss prominent issues such as Economy, Poverty, Unemployment, Migrant workers and human rights violation and the responsibility of the government | | | | | | | | 2 | | 1 | 1 | 1 | | | |
| | | C403.4 | Discuss Fundamental Rights and Directive Principles of State Policy in the Constitution of India in context with the present situation | | | | | | | | 2 | | 2 | 1 | 2 | | | |
| | | C403.5 | Discuss Universal declaration of human rights and provisions of India | | | | | | | | 2 | | 2 | 1 | 2 | | | |
| BTBS404 | Probability Theory and Random Processes | C404.1 | Find probability of given events Using addition and multiplication theorem. Apply Bayes theorem. Translate real-world problems into probability models. | 2 | 2 | | | | | | | | | | | 1 | 2 | |
| | | C404.2 | Find expectation and variance of discrete and continuous random variable. Find probability using Binomial, Poisson and Normal distribution | 2 | 1 | 1 | | | | | | | | | | 1 | 2 | |
| | | C404.3 | Calculate and interpret the correlation coefficient between two variables | 3 | 1 | 1 | | | | | | | | | | 1 | 2 | |
| | | C404.4 | Calculate the simple linear regression equation for a set of data. | 2 | 2 | 1 | | | | | | | | | | 1 | 2 | |
| | | C404.5 | Apply the concept of sampling theory to the engineering problems | 2 | 2 | | | | | | | | | | | 1 | 2 | |
| BTES405 | Digital Logic Design & Microprocessors | C405.1 | Illustrate the fundamental concepts of digital signal, positive and negative logic, Boolean algebra, logic gates, logical variables, the truth table, number systems, codes, and their interconversion, code error detection and correction. | 2 | 1 | 1 | | | | | | | | | 2 | 1 | | |
| | | C405.2 | Perceive, analyse and design various minimization techniques, combinational and sequential circuits, to develop skill to construct and troubleshoot digital circuits. | 2 | 1 | 1 | 1 | | | | | | | | 2 | 1 | | |
| | | C405.3 | Perceive the fundamentals and internal design of Microprocessors along with the features and their programming to build systems for real time applications | 2 | 2 | 1 | 1 | 1 | 1 | | | | | | 1 | 2 | 1 | 1 |
| BTCOL406A | Operating System Lab | L406A.1 | To Comprehend and Use basic concepts of Operating System with its structure | 2 | 2 | 2 | | 1 | | | | | | | 1 | 2 | 1 | 1 |
| | | L406A.2 | To Illustrate concepts of Process as well as Thread Management along with Implement concepts of CPU Scheduling algorithms. | 2 | 2 | 2 | | 1 | | | | | | | 2 | 1 | 1 | |
| | | L406A.3 | To Illustrate concepts of Process Synchronization as well as deadlock along with Implement concepts of Synchronization primitives and banker's algorithms | 2 | 2 | 2 | | 1 | | | | | | | 2 | 1 | 1 | |
| | | L406A.4 | To Comprehend concepts of Memory Management along with Implement concepts of page replacement algorithms and memory allocation algorithms | 2 | 2 | 2 | | 1 | | | | | | | 2 | 1 | 1 | |
| | | L406A.5 | To Illustrate concepts of File System Manipulation as well as Disk Management along with Implement concepts of file allocation algorithms and disk scheduling algorithms | 2 | 2 | 2 | | 1 | | | | | | | 1 | 2 | 1 | 1 |
| BTCOL406B | Python Programming Lab | L406B.1 | To Use the Python language syntax including control statements, loops and functions to write programs for a wide variety problem in mathematics, science, and games | 2 | 2 | 2 | 2 | 2 | | | | | | | 2 | 3 | 2 | 1 |
| | | L406B.2 | To Examine the core data structures like lists, dictionaries, tuples and sets in Python to store, process and sort the data | 2 | 2 | 2 | 2 | 2 | | | | | | | 2 | 3 | 2 | 1 |
| | | L406B.3 | To Determine the methods to handle the strings in python and to use string functions. | 2 | 2 | 2 | 2 | 2 | | | | | | | 2 | 3 | 2 | 1 |
| | | L406B.4 | To Interpret the concepts of Object-oriented programming as used in Python using encapsulation, polymorphism and inheritance. | 2 | 2 | 2 | 2 | 2 | | | | | | | 2 | 3 | 2 | 1 |
| | | L406B.5 | To Write a program to Read and write data from & to files in Python | 2 | 2 | 2 | 2 | 2 | | | | | | | 2 | 3 | 2 | 1 |
| BTCOS407A | Seminar - II: Design & Analysis of Algorithms Lab | L407.1 | To Use divide-and-conquer strategy to implement searching and sorting algorithms | 2 | 3 | 1 | 1 | 1 | | | | | | | 2 | 3 | 1 | |
| | | L407.2 | To Use Greedy methods to implement maximization and minimization problems | 2 | 3 | 1 | 1 | 1 | | | | | | | 2 | 3 | 1 | |
| | | L407.3 | To Use a dynamic Programming to implement the overlapping sub problems. | 2 | 3 | 1 | 1 | 1 | | | | | | | 2 | 3 | 1 | |
| | | L407.4 | To Use the distance matrix strategy to find the shortest path in connected graph. | 2 | 3 | 1 | 1 | 1 | | | | | | | 2 | 3 | 1 | |

The process of attainment of POs and PSOs of individual course in the four-year engineering degree program requires measuring tools. Respective faculty member prepares course outcomes using the concept of engineering subject. Then, a correlation is established between COs with POs/PSOs on the scale of 0 to 3 where 0 means no correlation and 3 means high correlation. Mapping matrix of COs-POs and COs-PSOs is prepared for all courses in the program.

Assessment tools are categorized into direct and indirect methods to assess whether the program specific outcomes (PSO) and program outcomes (PO) are attained. Direct methods include direct examinations of student, conducted throughout the semester. It is carried out in the form of continuous internal assessment tests, end semester examinations, assignments, unit tests and laboratory assignments etc. Indirect method is based on course exit survey, program exit survey, alumni survey etc. A target value is set for CO, PO and PSO and attainment is calculated with respect to that target value.

For CO attainment, it is calculated how many students have scored more than the target value which is already set by the course coordinator in the internal exam and university exams. Attainment levels are defined as per the following table:

| % students scored more than the target value | Attainment level |
|----------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

For PO attainment, multiplier factors are defined based on CO attainment as per following table:

| Percentage students scored more than the target value | Multiplier factor |
|-------------------------------------------------------|-------------------|
| 0-50% | 0.33 |
| 50-60% | 0.66 |
| >60% | 1 |

This multiplier factor is multiplied with the value assigned in the CO-PO relevance table and final attainment of each PO is calculated as demonstrated in the following steps :

PO attainment (Direct) is calculated by for both the internal assessment test and university exams for each. In the case of indirect attainment, it is calculated only on the basis of the course exit survey which is taken by the course coordinator at the end of the course.

Finally, an articulation matrix is formed, in which all subjects (from Sem I to Sem VIII) are incorporated with their PO and PSO attainment values (Direct/ indirect). For calculating program indirect attainment Average value of indirect attainment for all subjects is calculated and program indirect This final average value is considered as the program indirect attainment value. Direct attainment of the program is calculated by taking the average of PO values attained through university exams and internal assessment tests.

| Direct assessment Methods | | |
|---------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sr. No. | Assessment tool | Method description |
| 1. | Internal assessment test | The internal assessment(IA) marks in a theory paper is based on number of tests, conducted as scheduled in the departmental academic calendar. It is a metric to continuously assess the attainment of course outcomes with respect to course objectives. The total marks of all tests being asked for each CO is calculated for CO attainment purpose |
| 2. | Lab Assignments | Lab Assignment is one of the measuring criteria to mainly assess student's practical knowledge with their experimental capabilities. In case of practical, the IA marks shall be based on the laboratory records, practical tests and viva-voce |
| 3. | Theory Semester Examination & Practical Semester Examination | Semester examination (theory or practical) are the metric to assess whether all the course outcomes are attained or not, framed by the course owner. Semester Examination is more focused on attainment of course outcomes and uses a descriptive exam. |
| 4. | Seminar | The IA marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator assigned by the department |
| 5. | Mini Project | The IA marks in the case of mini-project shall be based on continuous evaluation by a faculty coordinator (project guide if allotted) assigned by the department |
| 6. | Project | The IA marks in projects in the final years shall be based on the continuous evaluation throughout the semester by an internal committee consisting of the three faculty members of the Department, one of whom shall be the project guide |

| BTEEC702 | High Voltage Engineering | CO702.2 | Explain the breakdown process in solid, liquid, and gaseous materials | 3 | 3 | 1 | | | | | | | 1 | 1 | 3 | 1 | | | |
| | | CO702.3 | Explain the methods for generation and measurement of High Voltages and Currents (both ac and dc) | 2 | 2 | 2 | | 1 | | | | | | | | 2 | | | |
| | | CO702.4 | Describe the phenomenon of over-voltage and choose appropriate insulation coordination levels based on IS & IEC Standards. | 2 | 2 | 1 | | | 1 | 1 | | | | | 1 | 1 | 2 | 1 | |
| BTEEC703 | Electrical Drives | CO703.1 | Analyze the dynamics of Electrical Drives system. | 3 | 2 | 1 | | | | | | | | 2 | 2 | 3 | 1 | | |
| | | CO703.2 | Use Various control techniques for controlling the speed of AC and DC motors. | 3 | 2 | 1 | 1 | | 1 | | | | | | 1 | 2 | 2 | 1 | |
| | | CO703.3 | Analyze the AC and DC drives. | 3 | 3 | 2 | 1 | | 1 | | | | | | 3 | 2 | 3 | 1 | |
| | | CO703.4 | To Select/recommend the appropriate Drive according to the particular applications. | 1 | 1 | 3 | 3 | | 1 | | | | | | | 1 | 2 | 3 | 1 |
| | | CO703.5 | State the recent technology of AC and DC drive | 2 | 1 | | | | 1 | | | | | | | 3 | 2 | | |
| BTEEE704B | Electric Traction & Utilization | CO704.1 | Identify types of Traction System. | 3 | 2 | 2 | | | | | | | | 2 | | 3 | | | |
| | | CO704.2 | Interpret Various Power supply in Electric Traction. | 3 | 3 | 2 | 1 | | | | | | | | 2 | 1 | 3 | 2 | |
| | | CO704.3 | Analyze Various Traction Motors. | 3 | 3 | 2 | 1 | | | | | | | | 2 | 1 | 3 | 2 | |
| | | CO704.4 | Define methods of Traction motor Control. | 3 | 3 | 2 | | | | | | | | | 2 | 1 | 3 | 2 | |
| | | CO704.5 | Elobrate Train movement & Breaking in Traction system. | 3 | 3 | 2 | 1 | | | | | | | | 2 | 1 | 3 | 2 | 1 |
| | | CO704.6 | Classify the indoor and outdoor Illumination system | 3 | 2 | 2 | | | | | | | | | 1 | | 2 | | |
| BTEEE705D | HVDC Transmission And FACTS | CO705.1 | To understand importance, configuration and types of HVDC transmission To analyse the operation of HVDC converter, system control and protection. | 3 | 2 | 2 | | | | | | | | | 1 | 2 | 1 | | |
| | | CO705.2 | To understand the concept of FACTS, their role, type and functionality. | 3 | 2 | 2 | | | | | | | | | 1 | 2 | 2 | | |
| | | CO705.3 | To analyze the operation of static series and shunt compensator | 3 | 2 | 2 | | | | | | | | | 1 | 2 | 2 | | |
| | | CO705.4 | Development of a program to analyse transient stability. | 3 | 3 | 1 | 3 | 3 | | | | | | | | 1 | | 2 | 1 |
| BTEEL706 | Power System Operation And Control Lab | CO706.2 | Development of a program to analyse economic load dispatch and load frequency control. | 3 | 3 | 1 | 3 | 3 | | | | | | | 1 | 2 | 2 | 1 | |
| | | CO706.3 | Development of a mathematical model of generator excitation control and AVR. | 3 | 3 | 1 | 2 | 3 | | | | | | | | 1 | | 2 | 1 |
| | | CO707.1 | Demonstrate the breakdown mechanism in solid, liquid, and gaseous dielectrics. | 3 | 2 | 2 | | | | 1 | | | | | | 1 | | 2 | 1 |
| BTEEL707 | High Voltage Engineering Lab | CO707.2 | Demonstrate the performance of high-voltage generation and protection devices. | 2 | | | | 1 | | | | | | | | 2 | | | |
| | | CO707.3 | Illustrate the effect of high voltage on biodiversity and protection by means of electrostatic shielding. | 2 | | | | 1 | | | | | | | 1 | 1 | 1 | 1 | |
| BTEEL708 | Electrical Drives Lab | CO708.1 | Efficiently use various DC drive. | 3 | | | | | 1 | | 2 | | | | | | 2 | | |
| | | CO708.2 | Efficiently use various AC drive. | 3 | | | | | 1 | | 2 | | | | | | 2 | | |
| | | CO708.3 | Simulate various drive system | 3 | | | 3 | | 1 | | 2 | | | | | | 2 | 1 | |
| BTEES709 | Seminar | CO709.1 | To discover recent trends in Electrical engineering | 3 | | | | | | | 2 | | | | 1 | 1 | | 3 | |
| | | CO709.2 | To use different techniques in order to formulate seminar topic | 2 | | | | 2 | | | 2 | | | | 2 | 1 | | 3 | |
| | | CO709.3 | To demonstrate the knowledge gained during seminar report writing and seminar presentation | 2 | | | | | | 3 | 3 | 3 | | | 2 | 1 | | 3 | |
| BTEEP710 | PROJECT PHASE-I | CO710.1 | To demonstrate the knowledge gained during project preparation with help of survey report writing and presentation | 1 | | | 1 | 2 | | | 1 | 3 | | | | | | | |
| | | CO710.2 | To use different research techniques in order to formulate problem statements | 2 | 3 | | 3 | 2 | | 1 | | 1 | | 3 | | 2 | 2 | 1 | |
| | | CO710.3 | To design the relevant solution in order to address the problem statement formulated | 2 | | 3 | 1 | 2 | 1 | | | 1 | | | 3 | | 2 | 1 | |
| | | CO710.4 | To practice core values of ethical principles, professional ethics and responsibilities | 1 | | | | 2 | | | 3 | | | | | | 2 | | |
| | | CO710.5 | To evaluate different solution based on fixed performance parameter in order to justify the applicability | 2 | | | 1 | 2 | | | | 1 | | | | | | | |
| BTEEF711 | INTERNSHIP EVALUATION-III | CO711.1 | To demonstrate the knowledge gained during internship with the help of survey report writing and presentation | 1 | | | 1 | 2 | | | | 3 | | | | | 2 | | |
| | | CO711.2 | To discover engineering and management principles useful at specific work environment | 1 | | | | 2 | | | | | 3 | | | | | | |
| | | CO711.3 | To implement the learning acquired during internship to solve environmental, societal issues and in their future endeavours | 1 | | | 1 | 2 | 2 | 2 | | | | | 3 | 1 | 2 | 3 | |
| | | CO711.4 | To practice core values of ethical principles professional ethics and responsibilities | 1 | | | | | | | 3 | | | | | | | | |
| BTEEO801 | Introduction To Industry 4.0 And Industrial Internet Of Things | CO801F.1 | Know about IoT and Industry 4.0 principles and its scope. | 1 | 1 | 1 | | 1 | | | | | | | | 1 | 2 | 1 | |
| | | CO801F.2 | Learn fundamentals of cyber security, Physical system and business models. | 1 | 1 | 2 | | 1 | 1 | | | | | | | | 1 | 1 | |
| | | CO801F.3 | Know fundamentals of networking protocols and sensors of IIoT. | 1 | 2 | | | | | | | | | | | 1 | 1 | 1 | |
| | | CO801F.4 | Learn IIoT Analytics, data management and advanced technologies. | 1 | | 2 | | 1 | | | | | | | | 1 | 1 | 2 | 1 |
| | | CO801F.5 | Development of application based on IIoT for Industry 4.0. | 1 | 1 | | | | 1 | | | | | | | | 1 | 1 | 1 |
| BTEEO802 | Joy of computing python | CO802.1 | Explain Python programming fundamentals. | 3 | 1 | 2 | | 1 | | | | | | | | | | | |
| | | CO802.2 | Implement Conditional statements and Loops in Python Programs | 3 | 1 | 2 | | 1 | | | | | | | 1 | | 1 | | |
| | | CO802.3 | Use Python lists, tuples and dictionaries for representing compound data. | 3 | 1 | 2 | | 1 | | | | | | | | 1 | | 1 | |
| | | CO802.4 | Develop Python programs by defining functions and calling them. | 3 | 1 | 2 | | 1 | | | | | | | | 1 | | 1 | |
| BTEEP803 | PROJECT PHASE-II | CO803.1 | To demonstrate the knowledge gained during project preparation with help of survey report writing and presentation | 1 | | | 1 | 2 | | | 1 | 3 | | | | | | | |
| | | CO803.2 | To use different research techniques in order to formulate problem statements | 2 | 3 | | 3 | 2 | | 1 | | 1 | | 3 | | 2 | 2 | 1 | |
| | | CO803.3 | To design the relevant solution in order to address the problem statement formulated | 2 | | 3 | 1 | 2 | 1 | | | 1 | | | 3 | | 2 | 1 | |
| | | CO803.4 | To practice core values of ethical principles, professional ethics and responsibilities | 1 | | | | 2 | | | 3 | | | | | | | 2 | |
| | | CO803.5 | To evaluate different solution based on fixed performance parameter in order to justify the applicability | 2 | | | 1 | 2 | | | | 1 | | | | | | | |

The process of attainment of POs and PSOs of individual course in the four-year engineering degree program requires measuring tools. Respective faculty member prepare course outcomes using the concept of engineering subject. Then, a correlation is established between COs with POs and COs with PSOs on the scale of 0 to 3 where 0 means no correlation and 3 means high correlation. Mapping matrix of COs-POs and COs-PSOs is prepared in this regard for all the courses in the program. Besides, mapping is the process of representing, preferably in matrix form, the correlation among the parameters.

Assessment tools are categorized into direct and indirect methods to assess the program specific outcomes (PSO) and program outcomes (PO). Direct method is based on assessment of PO and PSO. Indirect method is based on course end survey, program exit survey, alumni survey etc. Direct methods are computed through direct examinations of student conducted throughout the semester. It is carried out in the form of continuous internal assessment tests, end semester examinations, assignments, unit tests and laboratory assignments etc. The internal assessment marks in a theory paper are based on five assessment tools viz, continuous assessment I&II, mid semester exam, unit test and assignments. Total marks obtained from all tests is considered for calculating the attainment value. A target value is set for CO, PO and PSO.

For CO attainment, it is calculated how many students have scored more than the target value which is already set by the course coordinator in the internal exam and university exams. Attainment levels are defined as per the following table:

| Percentage students scored more than the target value | Attainment level |
|-------------------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

For PO attainment, multiplier factors are defined based on CO attainment as per following table:

| Percentage students scored more than the target value | Multiplier factor |
|-------------------------------------------------------|-------------------|
| 0-50% | 0.33 |
| 50-60% | 0.66 |
| >60% | 1 |

This multiplier factor is multiplied with the value assigned in the CO-PO relevance table and final attainment of each PO is calculated as demonstrated below:

POs and PSOs are evaluated separately for internal assessment tests and university exams. Program PO attainment (Direct) is calculated by taking the average of PO and PSO attainment values obtained in both the internal assessment test and university exams. In the case of indirect attainment, it is calculated only on the basis of the course exit survey which is taken by the course coordinator at the end of the course.

Finally, an articulation matrix is formed, in which all subjects (from Sem I to Sem VIII) are incorporated with their PO and PSO attainment values (Direct/ indirect). Averaging of all attainment values of all subjects for each PO is done for both direct and indirect attainment. This final average value is considered as the program indirect attainment value. Direct attainment of the program is calculated by taking the average of PO values attained through university exams and internal assessment tests.

| Sr. No. | Assessment tool | Method description |
| 1 | Internal assessment test | The internal assessment marks in a theory paper is based on a number of tests already mentioned which are conducted as scheduled in the departmental academic calendar. It is a metric to continuously assess the attainment of course outcomes with respect to course objectives. The total marks of all tests being asked for each CO is calculated for CO attainment purpose |
| 2 | Lab Assignments | Lab Assignment can be one of the measuring criteria to mainly assess student's practical knowledge with their designing capabilities. In case of Practical, the IA marks shall be based on the laboratory records and practical tests. |
| 3 | Theory Semester Examination & Practical Semester Examination | Semester examination (theory or practical) are the metric to assess whether all the course outcomes are attained or not framed by the course owner. Semester Examination is more focused on attainment of course outcomes and uses a descriptive exam. |
| 4 | Seminar | The internal assessment marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator assigned by the department |
| 5 | Mini Project | The internal assessment marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator (project guide if allotted) assigned by the department |
| 6 | Project | The internal Assessment marks in the case of projects in the in the final years shall be based on the continuous evaluation throughout the semester by an internal committee consisting of the three faculty members of the Department, one of whom shall be the project / seminar guide |

The process of attainment of POs and PSOs of individual course in the four-year engineering degree program requires measuring tools. Respective faculty member prepare course outcomes using the concept of engineering subject. Then, a correlation is established between COs with POs and COs with PSOs on the scale of 0 to 3 where 0 means no correlation and 3 means high correlation. Mapping matrix of COs-POs and COs-PSOs is prepared in this regard for all the courses in the program. Besides, mapping is the process of representing, preferably in matrix form, the correlation among the parameters.

Assessment tools are categorized into direct and indirect methods to assess the program specific outcomes (PSO) and program outcomes (PO). Direct method is based on assessment of PO and PSO. Indirect method is based on course end survey, program exit survey, alumni survey etc. Direct methods are computed through direct examinations of student conducted throughout the semester. It is carried out in the form of continuous internal assessment tests, end semester examinations, assignments, unit tests and laboratory assignments etc. The internal assessment marks in a theory paper are based on five assessment tools viz, continuous assessment I&II, mid semester exam, unit test and assignments. Total marks obtained from all tests is considered for calculating the attainment value. A target value is set for CO, PO and PSO.

For CO attainment, it is calculated how many students have scored more than the target value, which is already, set by the course coordinator in the internal exam and university exams. Attainment levels are defined as per the following table:

| Percentage students scored more than the target value | Attainment level |
|-------------------------------------------------------|------------------|
| 0-50% | 1 |
| 50-60% | 2 |
| >60% | 3 |

For PO attainment, multiplier factors are defined based on CO attainment as per following table:

| Percentage students scored more than the target value | Multiplier factor |
|-------------------------------------------------------|-------------------|
| 0-50% | 0.33 |
| 50-60% | 0.66 |
| >60% | 1 |

This multiplier factor is multiplied with the value assigned in the CO-PO relevance table and final attainment of each PO is calculated as demonstrated below:

| Subject | Subject Code | CO | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

POs and PSOs are evaluated separately for internal assessment tests and university exams. Program PO attainment (Direct) is calculated by taking the average of PO and PSO attainment values obtained in both the internal assessment test and university exams. In the case of indirect attainment, it is calculated only on the basis of the course exit survey which is taken by the course coordinator at the end of the course.

Finally, an articulation matrix is formed, in which all subjects (from Sem I to Sem VIII) are incorporated with their PO and PSO attainment values (Direct/ indirect). Averaging of all attainment values of all subjects for each PO is done for both direct and indirect attainment. This final average value is considered as the program indirect attainment value. Direct attainment of the program is calculated by taking the average of PO values attained through university exams and internal assessment tests.

| 1. | Internal assessment test | The internal assessment marks in a theory paper is based on a number of tests already mentioned which are conducted as scheduled in the departmental academic calendar. It is a metric to continuously assess the attainment of course outcomes with respect to course objectives. The total marks of all tests being asked for each CO is calculated for CO attainment purpose |
| 2. | Lab Assignments | Lab Assignment can be one of the measuring criteria to mainly assess student's practical knowledge with their designing capabilities. In case of Practical, the internal assessment marks shall be based on the laboratory records and practical tests. |
| 3. | Theory Semester Examination & Practical Semester Examination | Semester examination (theory or practical) are the metric to assess whether all the course outcomes are attained or not framed by the course owner. Semester Examination is more focused on attainment of course outcomes and uses a descriptive exam. |
| 4. | Seminar | The internal assessment marks in the case of seminar shall be based on continuous evaluation by a faculty coordinator assigned by the department |
| 5. | Mini Project | The internal assessment marks in the case of mini project shall be based on continuous evaluation by a faculty coordinator (project guide if allotted) assigned by the department |
| 6. | Project | The internal Assessment marks in the case of projects in the in the final years shall be based on the continuous evaluation throughout the semester by an internal committee consisting of the three faculty members of the Department, one of whom shall be the project / seminar guide |
