Concept of Entrepreneurship

Entrepreneurship is the ability and readiness to develop, organize and run a business enterprise, along with any of its uncertainties in order to make a profit. The most prominent example of entrepreneurship is the starting of new businesses.

In economics, entrepreneurship connected with land, labor, natural resources and capital can generate a profit. The entrepreneurial vision is defined by discovery and risk-taking and is an indispensable part of a nation's capacity to succeed in an ever-changing and more competitive global marketplace.

Meaning of Entrepreneur

The entrepreneur is defined as someone who has the ability and desire to establish, administer and succeed in a startup venture along with risk entitled to it, to make profits. The best example of entrepreneurship is the starting of a new business venture. The entrepreneurs are often known as a source of new ideas or innovators, and bring new ideas in the market by replacing old with a new invention.

It can be classified into small or home business to multinational companies. In economics, the profits that an entrepreneur makes is with a combination of land, natural resources, labor and capital.

What are the 4 Types of Entrepreneurship?

It is classified into the following types:

Small Business Entrepreneurship-

These businesses are a hairdresser, grocery store, travel agent, consultant, carpenter, plumber, electrician, etc. These people run or own their own business and hire family members or local employee. For them, the profit would be able

Shri Vile Parle Kelavani Mandal's DHULE Institute of Technology

to feed their family and not making 100 million business or taking over an industry. They fund their business by taking small business loans or loans from friends and family.

Scalable Startup Entrepreneurship-

This start-up entrepreneur starts a business knowing that their vision can change the world. They attract investors who think and encourage people who think out of the box. The research focuses on a scalable business and experimental models, so, they hire the best and the brightest employees. They require more venture capital to fuel and back their project or business.

Large Company Entrepreneurship-

These huge companies have defined life cycle. Most of these companies grow and sustain by offering new and innovative products that revolve around their main products. The change in technology, customer preferences, new competition, etc., build pressure for large companies to create an innovative product and sell it to the new set of customers in the new market. To cope with the rapid technological changes, the existing organizations either buy innovation enterprises or attempt to construct the product internally.

"An entrepreneur is a person who functions as an innovator, manger and co-coordinator."

The term "entrepreneur 'was applied to business initially by the French economists can till on, in the 18th century to designate a dealer who purchases the means production tor combining them into marketable products. The emergence of the entrepreneurial society may be major turning point in history. Only the entrepreneurs create capital, wealth and resources in a country there inventive and risk-taking behavior. They are the prime movers of industrial development in a country. Fact entrepreneurs are the builders of a nation and erectors of humanity their innovative vision, dynamic eider ship and creative decision behavior.

Bio Manish Agrawal

Manish is currently founder and CEO of Techment Technology, where they build a team of software developers using local talents and working on high end technology products from US and Indian startups. Within 2 year of operation they ramped up the team to 45 developers working mobile and web applications and will be venturing into BPM operation with an added capacity of 100.

Manish, acquired his undergraduate degree in Mechanical Engineering from IIT Bombay in 2002 and Masters Degree in Engineering from the Purdue University in 2004.

In December 2005, Manish co-founded Picsquare, his first start-up. As CEO of Picsquare, Manish was responsible for marketing and business development activities and executing long term vision of Picsquare. He played a key role in raising 2 rounds of investment for Picsquare. In November 2008, Picsquare was acquired by e-commerce portal Infibeam.com.

After successfully completing the transition of Picsquare to Infibeam.com, he moved back to his home town, Bhilai, to help his family in their business. He was responsible for setting up and operating a new rolling mill with capacity of 300 Metric Tonne per day.

Later he co-founded Techment Technology, an IT venture to be based in Raipur Chhattisgarh working along with start-ups and taking the complete responsibility of their technology and product development. Another unique aspect of Techment is - providing opportunities to local engineers to work on latest technologies who would otherwise migrate to metros. The model is widely appreciated by the state government with host of support from them.

He is also mentoring few start-ups and exploring investment opportunities in start-ups.

His interests include reading, travelling, meeting and helping young entrepreneurs.
