**One page report of Guest Lecture**

The guest lecture conducted by **Mr. Prashant Nawale** on **11th October 2019**, SY B.Tech of Mechanical Engineering Department. **Mr. Prashant Nawale** is working as **Project Staff** at **Indian Institute of Technology, Bombay (IITB)** and having the good hold on the subject.

CFD is based on the Navier-Stokes equations. Arising from applying Newton's second law to fluid motion, together with the assumption that the stress in the fluid is the sum of a diffusing viscous term and a pressure term, these equations describe how the velocity, pressure, temperature, and density of a moving fluid are correlated.

During two hours of session some case studies are elaborated. Students are highly motivated by his guidance.
