4. Green campus initiatives

These institutional efforts will help the campus become more environmentally friendly.

- I. Restricted entry of automobiles
- II. Battery-powered vehicles
- III. Pedestrian-friendly pathways
- IV. Ban on the use of Plastics
- V. Paperless office
- VI. Landscaping with trees and plants

I. Restricted entry of automobiles

As part of the Green Policy Initiative, all faculty, staff, and students are officially advised that driving on campus is strictly prohibited. Any student, member of the staff, or visitor who parks their car on institute property will be subject to punishment, it takes about 300 metres to get from a parking spot to the institute building.

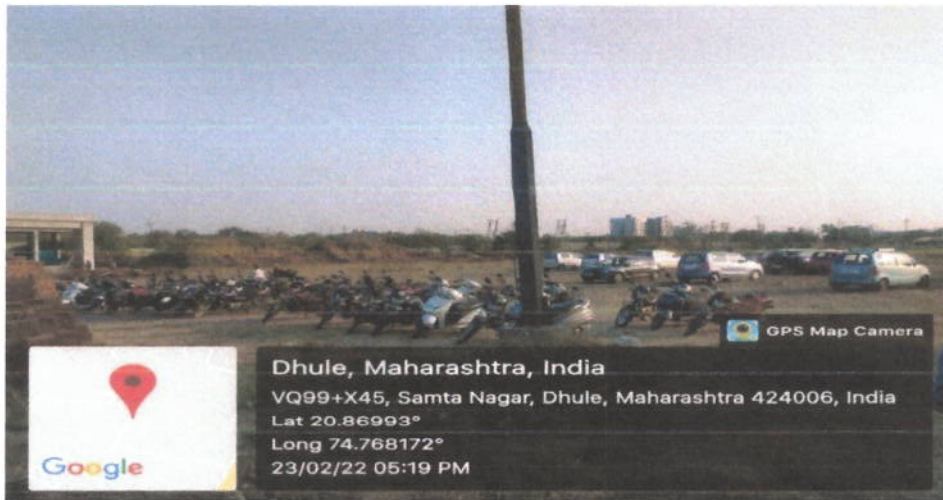

Photo of Parking for students and staff is available off-campus.

IV. Plastic-free campus

In order to reduce the usage of plastic, preference is given to non-plastic items in the institute's office, store, and canteen on campus. Single-use plastics, such as carry bags, glasses, spoons, and other items, are not permitted on campus and the college rigorously abides by the regulations surrounding their use. As per the College guidelines, Canteen Contractor is prohibited to use plastic cutlery, instead paper plates and wooden spoons are used.

Circular for Ban on Single-use Plastic

All students and staff members of SVKM's Institute of Technology, Dhule are hereby informed that we are devoted to upholding our obligation to the environment. We are happy to announce a complete ban on single-use plastic goods within our organization, starting with the academic year 2020-21, as part of our continued efforts to lessen our environmental impact.

This decision is in accordance with our commitment to environmental conservation, as single-use plastics pose a significant threat to our planet's well-being. We believe that by taking this step, we can contribute to a cleaner and healthier environment.

The ban covers the following single-use plastic items:

1. Plastic bags
2. Plastic straws
3. Plastic cutlery
4. Plastic cups and plates
5. Plastic water bottles
6. Plastic food containers

To support this initiative, we have implemented the following measures:

1. Alternative options such as reusable alternatives will be provided in our cafeteria and office facilities.
2. Awareness programs and training sessions will be conducted to educate our student & staff about the harmful effects of single-use plastic and the importance of reducing its usage.

We kindly request all students and employees to cooperate in implementing this ban by:

1. Using reusable alternatives whenever possible.
2. Ensuring proper segregation of any remaining plastic items in the designated day in waste dust bins.
3. Reporting any suggestions or concerns related to the implementation of this ban to the concerned department.

We believe that this initiative aligns with our values and commitment to a future. Let us work together to make a positive impact on the environment and set an example for others to follow. Thank you for your understanding and cooperation in making our institute more environmentally responsible.

V. Paperless office

The institute gives each employee a computer and access to the internet in an effort to promote the paperless office. Implemented it to cut down on paper work for academic, training & placement, and administrative tasks. Students, staff, and faculty use computers successfully for everyday tasks and updates, which eliminates paper work and saves time. Additionally, Principal and administrative office notices and circulars are sent to everyone via emails and SMS

VI. Landscaping with trees and plants

Tree planting activities were periodically carried out by the institute's NSS unit. This exercise promotes an eco-friendly environment that gives the school pure air and raises student awareness. Gardening and watering of all trees and plants are handled by a dedicated workforce. Some places have irrigation systems constructed in order to conserve water.

Photo of green landscaping

Sprinklers for irrigation can be utilised in institute Sprinkler irrigation systems may be utilised for the institute green landscape. Both sandy soil and uneven terrain with insufficient water supply can benefit from it. The revolving nozzle-topped perpendicular pipes are connected to the main pipeline at regular intervals. Water leaks from the revolving nozzles when it is pressurised and forced into the main pipe. The crop receives a spray of it. Water is piped to one or more central sites throughout the field for overhead high pressure sprinklers or guns to disperse during sprinkler or overhead irrigation.
